

[FOUNDER TOOLKIT] THE TOOLKIT SUITE · STAGE MAP

The whole flight / on one map.

Eleven companion artifacts, one journey. This map shows what to reach for at every stage from ideation to Series A — which toolkit answers which question, in what order, and how they stack into a single path. Start anywhere; the map shows you what comes before and after.

THE MASTER MAP

Eleven artifacts / one path to Series A.

Read left to right as the journey unfolds. Each bar is a toolkit; its width shows the stages where it does its work. Some are point tools (used at one stage); others — team, legal, model — run the whole way. Colour marks the layer-type used across the series: **blue** = aim/discover, **amber** = build & commercialize, **teal** = run & protect, **black** = the upstream strategy atlas.

ONE WORKED EXAMPLE THROUGHOUT

Aegis EO — a fictional Earth-observation-data venture for property insurance — runs through every toolkit: 52 discovery conversations → a validated PII-compliant-integration bet → a Munich Re pilot → a repeatable DACH-carrier motion → a clean cap table and a seed raise from strength. The same story, seen through each lens.

HOW TO USE THE SUITE

Start where you are / follow the path.

You don't read the suite cover to cover — you reach for the toolkit that answers the question in front of you. The map locates that question in the journey; these notes tell you how the pieces relate, and where each hands off to the next.

Strategy layer • upstream

The two artifacts that frame everything. Use them before and alongside the rest.

- **Strategy Pack** — 10 frameworks for where to play and how to win.
- **Flight Map** — the atlas: 18 lenses × 5 stages, telling you what to scan at each moment.

Aim & discover • the blue toolkits

Find and shape the right bet before building a business around it.

- **Product-Market Fit** — frame the bet, run discovery, measure fit.
- **Product Design** — decide what to build, at four altitudes.
- **Pilot Playbook** — land your first real customer.

Build & commercialize • the amber toolkits

Turn a validated product into a running, selling, funded business.

- **Go-to-Market** — build a repeatable sales engine.
- **Business Operations** — make the company visible and runnable.
- **Fundraising & Capital** — raise on purpose, from strength.

Run & protect • the teal toolkits

The disciplines that run the whole way — not a stage, a constant.

- **People & Equity** — the founding team, equity, conflict.
- **Legal & Incorporation** — the legal foundation under everything.
- **Financial Modeling** — the model that connects ops, money, and decisions.

THE FULL SEQUENCE • IDEATION → SERIES A

Strategy Pack → Flight Map → Product-Market Fit → Product Design → Pilot Playbook → Go-to-Market → Business Operations → People & Equity → Legal & Incorporation → Fundraising & Capital → Financial Modeling
